PERSONAL PROJECTS

Vehicle Registration System Using Blockchain

- Wrote a blockchain-based web application in Visual Studio Code. It fulfilled all features required for this type of application such as registering vehicles, Transfer ownership, And other RTO Operations.

Ticket Reservation System for Travelers

- This is a web application built using Javascript, HTML and CSS. This is a simple project where we are giving an option to users for booking their tickets choose places and print the booking form.

Inventory Management System

- Application to track how many products are currently left in inventory. So, when a customer places an order, the company can let them know how much product they can ship immediately.

CERTIFICATES
