PRATHMESH SURVE

Full Stack Software Engineer

Pune, Maharashtra, India - 411033 | prathamsurve101@gmail.com | +91 8390079850

LinkedIn | GitHub | LeetCode | Portfolio Website

Skills

Frontend: React.js, Next.js, JavaScript (ES6+), Redux, Angular, Tailwind CSS, Bootstrap, HTML5, CSS3, TypeScript

Backend & Database: Node.js, Express.js, FastAPI, REST APIs, Python, PostgreSQL, MySQL, SQL, Schema Design, Query Optimization, Streamlit, .Net Core

DevOps & Tools: Docker, Nginx, CI/CD, Git, GitHub, Linux/Ubuntu, Shell Scripting, Postman, JIRA, Render

Security & AI: RBAC, Authentication, Authorization, Audit Logging, CORS, Rate Limiting, APIs, AI Workflow Automation

Experience

Software Developer – Full Stack, VoltUp – Pune, India — Jun 2024 – Present

- Independently architected and deployed a production-grade CRM platform using **Next.js** and **FastAPI**, serving **4,000+ active users** with **99.9% uptime**; owned **Docker, Nginx, and CI/CD** deployment and PostgreSQL tuning.
- Built scalable frontend applications using **React.js, Angular, and Redux** (with some TypeScript), developing reusable component-based interfaces and integrating REST APIs across multi-role enterprise workflows.
- Leveraged AI-assisted development and prompt engineering across backend, DevOps, and database workflows, contributing to **40% faster deployment cycles** while extending ownership beyond core frontend responsibilities.
- Built real-time analytics dashboards using **Streamlit and Python** for revenue and KPI monitoring, reducing analysis turnaround time by **60%** and enabling faster, more confident business decision-making across the leadership team.

Frontend Developer Intern, AmpUp Energy Private Ltd. – Pune, India — Dec 2023 – Jun 2024

- Developed responsive, cross-browser interfaces using **React.js, JavaScript, HTML5, and CSS3** for EV charging platforms, integrating **REST APIs** and applying Git-based version control within an agile workflow.

Education

Ajeenkya D Y Patil University (ADYPU), **B.E., Computer Engineering** – Pune, India — July 2020 – June 2023

- CGPA: 7.98 | Relevant Coursework: Software Architecture, Learning Algorithms, and Computational Theories

Government Polytechnic, Karad, Diploma, Computer Engineering – Karad, India — June 2017 – Apr 2020

- Percentage: 82.17% | Coursework: Basics of Computer Engineering, Introduction to Programming Languages

New English School & Jr. College, Humgaon, SSC with MSBSHSE — June 2014 – May 2015

- Percentage: 91.40% | Coursework: Gurukul by Rayat Shikshan Sanstha, Satara (Semi-English)

Projects

Smart **Role-Based Access** Logging System – React.js, Node.js, FastAPI, PostgreSQL — Feb 2025 – Present

- Built a secure enterprise web platform with dynamic **Role-Based Access Control (RBAC)**, real-time audit logging, and a React.js administration dashboard for managing roles, permissions, and hierarchical access control.
- Designed and optimized PostgreSQL schemas using indexing, normalization, and query optimization techniques to support fast data retrieval, long-term scalability, and overall data integrity for the platform.

LinkedIn **Profile API** – Node.js, Express.js, Docker, Zod — Aug 2026 – Sep 2026

- Designed and built a production-ready **REST API** using **Node.js and Express.js** with a layered, provider-based architecture, so data sources and business logic can evolve independently of the validation and response layers.
- Implemented security and reliability practices – **Helmet, CORS, per-IP rate limiting**, and Zod request validation – with full automated test coverage using **Vitest and Supertest**; containerized with **Docker** and deployed on Render.

Vending Machine Management – PostgreSQL, Angular, Node.js — June 2024 – Aug 2024

- Built dedicated workflows for a new user type to manage machines, track stock, and handle sales operations, with a seamless, easy-to-use **Angular** UI for all of these day-to-day operational tasks and responsibilities.
- Developed **automated wallet creation** and transactional logic with balance checks and deductions, backed by a **PostgreSQL** schema designed specifically for the wallet and transaction modules and their records.

Achievements

- Ranked in **top 4.2% globally** on LeetCode (2024) by solving 100+ challenges with consistent daily practice.
- Won **1st prize in coding** and secured runner-up in blind debugging at an inter-college competition (2022).
- Got merit for the year of board examination for high school, scoring **100 out of 100** in Mathematics and Sanskrit.
